USER MANUAL

Digital Picture Frame

SPDPF84M

Table of Contents

Overview

- Your new Smartparts, Inc. Digital Picture Frame lets you view your digital pictures and listen to your MP3 music from **memory cards or the built-in memory**.
- You can enjoy your photos any time and anywhere.
- The frame is an ideal way to display your digital photographs
- The **Slide Show mode** is a convenient method to display all of your pictures in a continuous mode – it offers you many pre-programmed transitions from slide to slide
- Most functions of your digital picture frame can be controlled with the enclosed **Remote Control**
- The Digital Picture Frame doesn't require a direct connection to a computer – the **built-in card reader** can read memory cards
- Pictures can be transferred from a memory card to the internal memory without the use of a computer
- It supports all popular types of memory cards and file formats
- The digital picture frame is a **digital photo album** that lets you display hundreds of pictures anywhere in your home or office
- It can be connected to a computer and pictures can be **up-loaded** (from computer to memory card/internal memory) or **downloaded** (from memory card/internal memory to computer)
- **Music** in the MP3 format can be played on the Digital Picture Frame

Features

➢ Your frame supports JPEG photo files, MP3 music files, and MPEG-1, -2 and -4 and AVI Motion JPEG video files.

➢ The resolution of the screen is 800x600 pixels.

➢ Compatible with: Compact Flash (CF), Secure Digital (SD), Multimedia Card (MMC), Memory Stick (MS), and xD memory cards.

➢ USB 2.0 connection – compatible with Windows XP and Windows 2000.

➢ The frame allows users to delete, rotate and/or pan pictures, play music (MP3 format), play movie clips, create slide shows and move pictures between the memory cards and a computer.

Getting Started

Package Contents

The box should include:

- Digital picture frame
- AC Power Adapter
- USB Cable
- Remote control
- User manual

Connecting Your Frame

Plug one end of the AC Adapter into the digital photo frame and the other end into a standard 110-240 volt 50-60 Hz AC electrical outlet. Insert a memory card into the appropriate card slot. Press the Power Switch to the ON position. A slide show displaying the pictures on your memory card will start automatically. If no card is inserted and there are pictures on the frame's internal memory, the slide show will display the photos stored on the internal memory.

When more than one storage medium is present (an SD card and the internal memory, for example) it is possible to switch between the two. Press the Stop button until you see the icons of the various memory types. Use the arrow buttons to highlight the desired memory type and press Enter to select. Press Enter again to start a slide show using the selected memory type.

If not already selected, highlight the appropriate memory card type on the first menu screen by using the arrow buttons on the remote control. Press the Enter button to confirm the selection. On the next menu, scroll using the arrow buttons to select Photo. On the next menu, press Slideshow on the remote control to display images.

Connecting to a PC

The frame has a USB port for connection to a PC and a second port for connection to other devices such as a USB flash drive, USB card reader, or a camera. When connected to the PC you can drag-and-drop content from the PC to the internal memory or memory card. You can also delete content from internal memory.

Remote Control

The remote control is used to conveniently manage the media to be played. The layout is designed for maximum ease of use, and because the menu functions all operate in a similar manner navigation is quick and easy to learn.

Button	Function
On/Off	Turn screen On and Off
Volume (-)	Decrease Volume
Volume (+)	Increase Volume
Slide Show	Play slideshow

Text

This function is used to display text files. Use the arrow buttons on the remote control to scroll up and down.

Edit

The Edit menu is used to copy and delete files.

The Copy/Delete function is used to copy files from one medium to another or to delete files. In this manner files that are on the external or internal memory can be copied to another memory type (external or internal). Files can also be deleted in the same manner. Select the Edit icon. The next screen is to select the media where the "From" files are located. Use the Up and Down arrow buttons to locate the desired files. Press the right button to tag the files.   Now use the Left arrow button to get back to the media screen. Highlight the "To" media and press Enter. Press the Setup button to access the control screen. To Copy and Paste the file, highlight the second icon and press Enter. While copying, the screen will display a busy message followed by a complete message when the copy / paste function is complete. When the message appears choose OK by pressing the Enter key.

To delete an item that you have tagged, select the third icon (trash can).

Setup

The Setup menu allows you to make the following types of adjustments to the way the frame functions:

Language Set
This menu allows you to select the language that is displayed on the screen. Press Enter to access the menu, highlight the language you want, then press Enter again.   Press the left arrow to exit.

Picture Set
Press Enter to access the settings.
Slideshow Mode – Press the right arrow button to access a drop-down menu. Use the up or down arrow buttons to highlight Fast, Middle or Slow (the highlight is a yellow border around the word). Press Enter to select the slide show speed.
Picture Play Mode – Press the right arrow button to enter the menu. Use the up or down arrow buttons to select the style of transitions you prefer for the slide show.   Press Enter to select. Press the left arrow button to exit this menu.
Press the left arrow button to leave the Picture Set menu.

StartUp Set

The StartUp Set menu determines which screen appears when the unit is first turned on. Press Enter to access the menu, then use the up or down arrow buttons to highlight your choice. Press Enter to move the asterisk, and then press the left arrow button to exit the menu.

Video Set

Options in the Video Set menu include Brightness, Contrast and Color Saturation. Press Enter to access the menu, and then use the left or right arrow buttons to adjust the settings. Press Enter again to exit the menu.

Default Set

In this menu, the player's default settings can be restored. Press Enter to access the menu, and then press Enter again to restore the frame to its factory default settings.

Warranty and Technical Support

Please refer to our web site at www.smartpartsproducts.com for technical support and warranty information.

♦ On some units the Setup button is used to call up the control screen.
